

Survival Flight Inc. is a premier emergency medical transportation company dedicated to medical transportation focusing on the quality of care to our patients and their safety with aviation and ground medical transportation. Our mission and purpose is to serve our customers with unsurpassed and rapid medical services to save lives.

Our top priority is to extend and enhance a patient's life by safely providing air transport delivery to an immediate in-house medical staff and facility. We passionately serve those who have unexpectedly found themselves threatened by life's unforeseen situations and devote everything we do to ensure our patients get our full focus and expertise to preserve and enhance their safety until they are transported to the medical care they require. Survival Flight also values the importance of family which is why all Survival Flight aircraft are third rider equipped. This capability allows a patient's family member to fly with their loved one when necessary. This capability is a true advantage especially in the case when a pediatric patient is flown because a parent or other loved one can fly with the child.

Members of the Survival Flight membership program is guaranteed not to receive any out-of-pocket bills from Survival Flight. Survival Flight members are not billed for expenses resulting from their air medical transportation by Survival Flight, which were not covered by their insurance provider or other benefits providers' coverage plans. Membership with Survival Flight will also cover Survival Flight Ground EMS with certain limitations as listed within the Terms of Use.

If you have any additional questions regarding our charity or membership programs, please contact us at (870) 793-0998.
